Last regime relegated "Field Deputy" to respond, with little power, but she did more for us than anyone ever has.

Team,

I appreciate the vigilance.

It is important to recognize this effort is a process. The first stage of this proposal is the Griffith Park Transportation plan. There is a mandatory 30 day public comment period. Following this will likely include a policy proposal regarding current tourist magnets, slated for mid January. I expect this will also require a similar public comment period. I will provide an update on the exact date upon announcement.

I do believe Councilman Ryu is developing a comprehensive plan to address and attack these problems, and this takes time. Right or wrong, these rouge locations exist and solutions take time to analyze, vet and implement. If I had it my way, this would be done tomorrow. But I recognize the reality of developing a systemic plan that mitigates the problem, rather than shifting it. I believe the CM's office is spearheading the comprehensive solution and highly active in this process.

I think it is entirely fair and reasonable to provide the CM and his team some latitude to develop these comprehensive solutions. The Griffith Park Transportation Plan is an excellent example of the sound methodology they are employing (along with the applicable departments) in cultivating effective strategies and policies. The Legacy of the previous administration has left deep wounds and has undermined the trust in local government which is a travesty. But New Leadership exists, and from everything I have gathered, they very much hear us.

Given that, I do believe these emails, as I have said previously, can lead to unintended consequences that put our community at arms length from city leaders when final considerations are made.

Our concerns are rooted in fact and our proposed solutions are sound in logic, but we must stay the course in our messaging. We will not let up in this effort - I am a staunch public safety advocate and the current situation is unsustainable and untenable - Period.

As solutions are developed for our benefit and the benefit of the broader community, I hope you will join me in providing the CM's office latitude and gratitude for their leadership related to this matter. If the course changes, our strategies and communication shall change as well. But for now, their efforts and policy proposals are encouraging.

Again, I must stress, our communication with the CD4 leadership team should be focused on problem solving - not alienating their support and commitment to our community.

We are making great progress.

Regards,

Khaled

Thanks. We know.

We have two meetings with Rec and Parks this week to try to get firmer commitments specifically on timing. We will update soon.
